PUBLISHABLE PROJECT ABSTRACT

The overarching goal of SUSFOOD2 is to reinforce the cooperation in research, development and innovation between EU Member and associated States in order to make food systems (production to consumption) more sustainable, resilient and secure. With financial support of the European Commission (EC), the proposing consortium will organise and fund a joint call for transnational research projects on sustainable food production and consumption. Beyond this co-funded call other joint activities in this thematic area will be undertaken, thus contributing to the establishment of a resource-efficient, sustainable Bioeconomy in the European Research Area. The proposal responds to topic SFS-19-2016 B of the work programme 2016-2017 of societal challenge 2 (Food security, sustainable agriculture and forestry, marine and maritime and inland water research and the bioeconomy) under Horizon 2020. The consortium will intensify, broaden and deepen the successful cooperation established in the framework of its predecessor FP7 ERA-Net SUSFOOD.

DESCRIPTION OF WORK

The co-funded call and its different components will be implemented in the frame of five distinct and intertwined work packages (WP1-5). The SUSFOOD2 network will also take action alongside and beyond the co-funded call, as outlined in three more WPs (WP6-8). Strong synergies are needed between the WPs (Figure 4) to ensure both the sound management of the co-funded call as well as the successful implementation of the additional activities. The consortium will build upon results, experiences and best practices gathered during the FP7 ERA-NET SUS-FOOD.

WP1 Coordination and management of the SUSFOOD2 Cofund will be led by JUELICH in cooperation with the bodies described in section 3.2 "Management structure and procedures" below.

Because the co-funded call will be launched nearly simultaneously with the start of the SUSFOOD2 Cofund, much of the preparation for the call will be done before month 1 (M1). For instance, the preparation of the call announcement for the co-funded call (see Tasks 2.1, 2.2 and 2.3) will need to be in place, including the scope, call procedures, national regulations. xxxxxxxxxxxx

WP2 Preparation and launch of the co-funded call will be led by JUELICH. In the frame of this WP, the documents needed for the call will be prepared and made available to potential applicants. An easy-to-handle call management tool (including an online submission tool) will be set up for optimal ease and efficiency of proposal submission. WP2 will also ensure the interface with applicants along the call process. This WP will interact closely with other WPs, e.g. WP3 to facilitate the evaluation of the proposals. xxxxxx

ETHICAL ISSUES

none

properties of the end-product; determination of the environmental impacts associated with the production of protein enriched pasta through LCA (WP5). For all the new protein-rich products achieved in the project, Partner 3 will organize consumer studies (WP2).
